M2 GLOBAL EARNS AS9100 AEROSPACE QUALITY SYSTEMS CERTIFICATION

M2 Global Technology, Ltd. Today announced that it has been awarded AS9100 certification. M2 Global has met the stringent requirements necessary for this international aerospace quality system standard for aerospace industry suppliers, ensuring customers that the company meets the highest quality standards.

“In today’s competitive environment, quality conformance is expected, but AS9100 shows that M2 Global has implemented an effective and reliable business system. It illustrates our commitment to providing customers with the highest caliber products and services,” said Douglas Carlberg, President of M2 Global. Quality Manager Wayne Richie added, “M2 Global’s AS9100 certification demonstrates our core commitment to the highest quality and reliability standard in the industry.”

The AS9100 standard was established by the International Aerospace Quality Group (IAQG) for the purpose of achieving significant industry improvements in quality and safety, with reductions in cost throughout the value stream. This organization includes representatives from aerospace companies in America, Asia and the Pacific Rim, and Europe.

M2 Global’s certification was awarded by Det Norske Veritas Certification, Inc. (DNV), one of the world’s leading certification registrars. The AS9100 registration is held in conjunction with M2 Global’s current ISO 9000-2000 certification.
